DETAILED ACTION

Status of the Application

1. Receipt is acknowledged of an after-final amendment dated September 2, 2005.

Status of the Claims

2. Claims 1, 15, 51, 66 and 81-150 were pending. Applicants canceled claims 1, 15, 51, 66, 82-84, 93, 97-106, 111-113, 115, 118 and 126-150. Therefore, claims 81, 85-92, 94-96, 107-110, 114, 116, 117 and 119-125 are currently pending.

Examiner's Amendment

3. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with Mr. Frank C. Eisenschenk on September 15, 2005 (see attached interview summary).

The application has been amended as follows:

- a. Claim 120 is canceled.

Reasons for Allowance

4. The following is the Examiner's statement of reasons for allowance:

Art Unit: 1639

The claims are allowed for the reasons that the prior art of record does not teach or fairly suggest Applicants' claimed method. The closest prior art of record, Levinson et al., does not teach the use of Applicants' claimed array of crystallized calcium oxalate samples in liquid form with salts of citric acid especially as used in conjunction with a combination of both polarized light analysis and Raman spectroscopy. Furthermore, the other cited references of record (i.e., Selengut et al., Klein et al., Jandeleit et al., Embiata et al., and Findlay et al.) fail to rectify these deficiencies.
